Intermediate_MPC (55.0%)

**Z P High School , Gandepalli**                                                        **2013 - 2014**
Secondary School Of Certificate (8.3 CGPA)

## SKILLS

**Frontend**:  HTML, CSS, Bootstrap, JavaScript, React.js
**Backend**:  Python, Express, Node.js
**Databases**:  SQLite
**Other skills:** AI / ML, AWS, Data Analytics, Data Structures &
Algorithms, DevOps, Express(node), Flexbox, Git, Linux, Microsoft
Power BI, MongoDB, PHP

## PROJECTS

**Nxt Watch (YesuWatch.ccbp.tech)**
Implemented Nxt Watch application which is a clone for YouTube where users can log in and can see a list of videos like Trending, Gaming, Saved videos, and also can search videos and view specific video details, and users can toggle the theme (Light/Dark).

- Implemented Different pages like Login, Home, Trending, Gaming, Saved videos using React components, props, state, lists, event handlers, form inputs.
- Authenticating by taking username, password and doing login post HTTP API Call.
- Persisted user login state by keeping jwt token in local storage, Sending it in headers of further API calls to authorize the user.
- Implemented different routes for Login, Home, Trending, Gaming, Saved videos, Video item details pages by using React Router components Route, Switch, Link.
- Redirecting to the login page if the user tries to open Home, Trending, Gaming, Saved videos, Video item details routes which need authentication by implementing protected Route.

**Technologies used:** React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication

**Nxt Trendz ( ECommerce Clone - Amazon, Flipkart) (nxttrndsbyk.ccbp.tech)**
Implemented Nxt Trendz application which is a clone for ECommerce applications like Amazon, Flipkart where users can login and can see list of products with search, filters, sort by, etc..

- Implemented Different pages and routes for Login, Products, Product details using React Router components Route, Switch, Link, props, state, lists, event handlers, form inputs.

- Authenticating and authorizing users by taking username, password and doing login POST HTTP API Call and implementing filters by sending them as query parameters to product api calls.
- Persisted user login state by keeping jwt token in local storage, Sending it in headers of further api calls to authorize the user.

**Technologies used:** React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication

**Chatbot ([yesugenai.ccbp.tech](yesugenai.ccbp.tech))**

An innovative Chatbot designed to offer personalized and engaging interactions with users.
- User-friendly UI created using HTML, CSS, and Bootstrap to display user-chatbot interactions.
- Dynamic display of user inputs and chatbot responses achieved through JavaScript DOM operations and Array methods.
- Chatbot responses tailored to user inputs by filtering relevant answers from its predefined list.

**Technologies used:** HTML, CSS, JS, Bootstrap

**Jobby App (Job Finder) ([byjobby.ccbp.tech](byjobby.ccbp.tech))**

In this project, I have developed the Jobby App, an application that offers a user-friendly platform for job seekers. Users can log in and access a comprehensive list of job opportunities with various features, including search functionality by job title and filtering options based on salary range and employment type.

Login credentials for all projects :
username: rahul
password: rahul@2021
**Technologies used:** CSS, JavaScript, React.js, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication.
